

# REAR SINGLE TOWER

The opposite of the front corner tower, this type is common in Islamic architecture in Ontario. In Christian architecture, the tower is located at the back of the building, either flanking a chancel or centrally marking the change between nave and chancel. Examples: 1. St. Mary's Roman Catholic Church (Fort Francis) 2. Jami Masjid (Brampton), 3. Church of the Good Thief Catholic Church (Kingston), 4. Mennonite Brethren Church (Waterloo)
